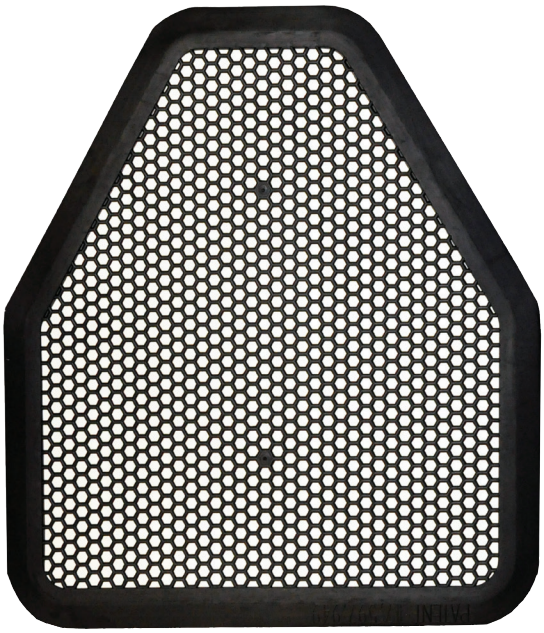
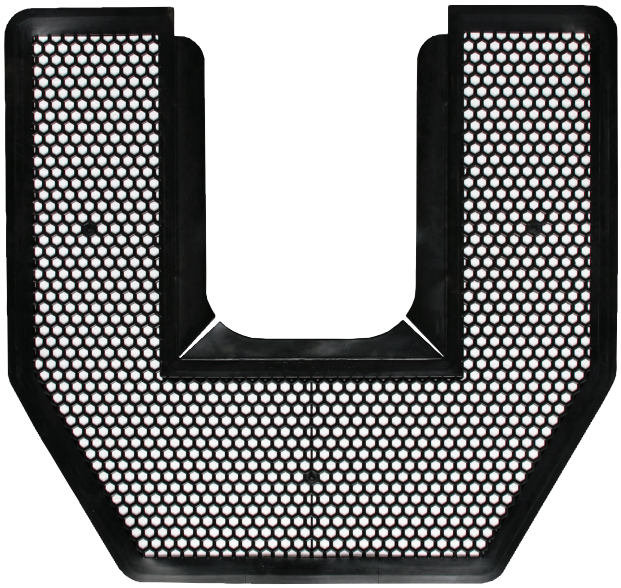
eco choice®

Urinal and Commode Mats





Size Matters
Eco Choice® urinal and commode mats are approximately 5% larger than traditional products and provide greater protection to the floor

Increased Grip
Eco Choice® urinal and commode mats are manufactured with a material that has a high coefficient of friction - They have better traction

Better Absorbency
Tapered hexagon openings direct fluids to the absorbent material that is designed to absorb liquids quickly and not leave unsightly stains on the material's surface

Heavy-Duty
Weighs 75% more than standard mats!

Biodegradable
Independent studies prove that EcoChoice® products will biodegrade in a landfill in a period greater than one year

Increased Flexibility
Softer, flexible material conforms to surface irregularities and provides secure placement of mats

ADA Compliant
A 36% reduction in the product profile makes Eco Choice® urinal & commode mats ADA compliant against trip hazards

Eliminates Odors
Absorbent core contains odor neutralizing agent to eliminate odors from trapped liquids

eco choice®

Biodegradable

Independent studies prove that EcoChoice® products will biodegrade in a landfill and help regenerate soil by leaving behind methane and humus.

Reusable

EcoChoice® products have the same long life of our standard products and are NOT affected by light, heat or humidity like Oxo Degrader and Bioplastics.

Recyclable

EcoChoice® products are fully recyclable in the current recycle stream.

Eco-Nomical™

Maybe the best part is that EcoChoice® products cost no more than similar, non-biodegradable products. Why wouldn't you do this?
